Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The prior restriction requirement has been vacated in view of the following restriction required under 35 U.S.C. 121 and 372. The previous restriction requirements were based on US restriction practice, which is improper in a 371 national stage application. I regret any inconvenience this may have caused you.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, 12-13, 15, 38, 41, 42, 43, drawn to a damping structure having an elastic means exerting elastic pressure on a rigid plate to constrain an aggregate.

Group II, claims 8-11, 14, 16-25, 33-36, drawn to a damping structure having a partially pierced internal partition arranged inside an internal cavity.

Group III, claims 26-32, 37, 39, drawn to a damping structure having a rigid means for closing off the internal cavity.

Group IV, claim 40 drawn to a suspension system in a rotary wing aircraft having a damping structure.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: groups I-IV do not have a common special technical feature. Group I has the special technical feature of an elastic means, which is not found in any of the other groups. Group II has the special technical feature of an internal partition, which is not found in any of the other groups. Groups III and IV have common features with the other groups, i.e. aggregate

Art Unit: 3683

and rigid plate, but since these are old and well known features (see references cited by applicant), they cannot constitute a special technical feature. Thus, Groups III and IV do not have a common special technical feature with any of the other groups.

A telephone call was made to Mr. Ledbetter on 02/14/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Jack W Lavinder at telephone number 703-308-3421.
